MAYSVILLE, KENTUCKY, WEDNESDAY, NOV. 17, 1920.

ONE COPY—TWO CENTS

LEXINGTON BOY SCOUT PARADE HAD TOO MUCH WEATHER

But Drive Continued—Maysville Boys' Band Center of Attraction—Headed By Federal Judge Cochran.

Jotten luck seems to go with the Maysville Boys' Band on their big city trips.

A drenching downpour of rain drowned out the big Knights Templar parade in Cincinnati and a snow storm and sloppy streets caused the Lexington Boys' Scout to call off the big parade in Lexington Tuesday afternoon. Our band captured the metropolis of the Bluegrass on Tuesday, however, despite their inability to appear on parade.

The band was met at the Lexington union depot by a large delegation of Maysville people headed by Judge A. M. J. Cochran, who was just a little late at opening Federal Court in Lexington, awaiting to greet the Maysville youngsters.

Concerts in the lobbies of the Phoenix and LaFayette Hotels attracted great crowds and brought much cheering and many compliments from Lexington people. A great delegation of Lexington Boys Scouts were grouped about the band at the LaFayette concert Tuesday evening. The scouts carried banners which read: "We Want a Band Like This One," "Help Lexington Get a Boys' Band," and the like.

The band never played better and their music was heartily appreciated as was evidenced by the great throng gathered in the lobby and the liberal applause.

During the morning the boys were the guests of the Lexington Boy Scouts on an automobile trip about the city.

REV. DICKEY CONTINUES TO IMPROVE DAILY.

Word from the bedside of Rev. J. J. Dickey today at noon gives the encouraging report that he has passed the serious point of his recent unfortunate accident, and is doing fine. All that is necessary now is the "kneeling" of the broken bones, which, of course, will take some time. Present indications show he will have use of his arm and hand. His numerous friends will be glad to learn of this. He asks to be remembered to all of those who have manifested such kindly interest in his welfare.

TURKEY CROP IS SHORT THIS SEASON

Shipments From This Section to the City Markets Are About Half Of the Average.

Slaughterers of turkeys in this city and vicinity this year report a big shortage of the crop of this toothsome bird this year, consequently somebody is going to do without turkey on Thanksgiving.

Up to today, only about one-half as many fowls have been slaughtered as had been last year, dealers being unable to get them, and the short crop has made the price soar to 37 cents per pound mark for turkeys on foot, and after they are dressed and ready for the retail market the price will more than likely look like 60 cents per pound.

We are sincerely in hopes the butcher man will not see this and raise the price of soup bones so that we will be knocked out of our turkey for Thanksgiving.

METHODIST KNOW NO LET IT P.

With the same inspiration, organization and determination with which they launched and carried to a successful conclusion their great Centenary subscription drive, they are now keeping their people enthused over the collection of these pledges.

The Southern Methodists of Kentucky have appointed November 21-28, 1920, as "Pay-up Week."

The secretaries are being cheered by the assuring messages of full collections, and the fine reports of the treasurers, to pass on the good news, which, in turn, is arousing the church throughout the state.

The membership of each Methodist conference felt the honor of a part in the subscription effort of the summer of 1919, and the outgrowth of that feeling and that success is the present expression of faith in the centenary, and the forward movement being inaugurated by the local and national offices.

MAYSVILLE ODDFELLOWS HONORED BY GRAND LODGE.

Maysville Oddfellows were signally honored at the meeting of the Grand Lodge of Oddfellows which opened in Lexington Tuesday and will close tonight. Dr. J. A. Dodson was named a member of the committee and the state arm and hand. His numerous friends will be glad to learn of this. He asks to be remembered to all of those who have manifested such kindly interest in his welfare.

ANNUAL REPORT OF HEALTH LEAGUE OF MASON COUNTY

Work Done By This Important Branch Shows the Officer and Health Nurses Have Been Busy.

Due to the change in the health department, this report has been delayed. The new health officer, Dr. B. F. Reynolds, from Carlisle, and the new county nurse, Adele Wettlaufer, from Louisville, took charge of the work in September and started immediately with the medical inspection of the schools.

All the children in the city schools have been examined, and among them were 106 defective ones. Many more with minor defects which have not been placed on our list.

Follow-up work has been done and efforts made to have the defects corrected, which has been a success in some cases, and it is hoped, will be in many more.

The city school examination would have been completed long before this time had not the scarlet fever epidemic in the schools, and the diphtheria epidemic in the county greatly handicapped the work.

Another great handicap has been the lack of a machine for the personal use of the county nurse, but still the work has been done to the best of their ability. Many trips had to be made to take cultures, quarantine and give prophylactic treatment and fumigate homes and schools both in city and county. These epidemics have caused the health department a great deal of extra work, both in prophylactic and curative measures.

Number of cases under care, 115; new cases, 102; readmitted cases, 24. Total cases during September and October, 241; dismissed, 126; remaining end of October, 115.

Condition on discharge—Recovered 45; improved, 30; unimproved, 4; died, 2.

Record of visits made—Nursing, 164; infant welfare, 15; prenatal, 7; tuberculosis, 13; to schools, 72; homes of school children, 186; office treatments, 60; attendance at clinics, 22; sanitary inspection, 19; other visits, 134. Total, 667.

Miscellaneous—Talks given, 21; night calls after 8 p. m., 2.

Nature of Cases—Prenatal, 2; post-natal care only, 1; typhoid, 1; tuberculosis, 3; follow-up school cases, 49; gastro-intestinal disease in infants, 2; well babies under supervision, 1; chronic illness, 6; surgical dressings, 3; accident, 2; communicable diseases, 18; all others, 45.

Financial—Number of Metropolitan cases during the month, 24; paying patients, 1; free patients, 216; money due from Metropolitan, \$322; fees collected, \$6.

Collected and sent to laboratory, water samples, 11; hookworm specimens, 9; weighed, measured, tested vision and assisted with medical examination of school children, 1,654; literature distributed, 1,632; culture taken for diphtheria, 36; quarantine, 14; excluded children from school for pertussis, 4; fumigated, 22; assisted with administration of antitoxin for diphtheria, 9; procured admission and transferred old lady to alms house, 1; investigation for city alms committee, 1; accompanied children to physician's office, 3; school children to oculist, 1; procured admission and accompanied patient to hospital in Covington for foot amputation, 1; prepared for and assisted with operations, 3; Wasserman taken, 1; procured help from Red Cross for ex-soldier, 1; tuberculosis specimen sent to laboratory, 1; secured special nurse for mental case, 1; defects remedied in follow up work of school children, 19; official interviews, 6.

Hoping this report will show how necessary the work done by Health Department is and asking the hearty cooperation of the whole community. Public health is public wealth.

NO HOG SHOW AT TOBACCO FAIR.

Due to the fact that there have been a number of cases of hog cholera found in Mason county I have requested that the Fair management cancel the premiums offered for swine, and that no hogs be received at the fair. This action was necessary in order that nothing be done which might cause the spread of the disease. Swine breeders will please take notice that there will be no hogs received at the fair, and no pens will be prepared for their exhibition. GEORGE KIRK, County Agent.

DAUGHTERS OF THE CONFEDERACY.

Please send donations for the Thanksgiving box for the Confederate Home, to Mrs. Carolyn Russell, not later than Friday, November 19.

Mr. T. G. Ollmore, of Lexington, is in this city in the interest of the E. R. Webster Co.

MERCHANTS URGED TO MAKE HOLIDAY DISPLAYS

During Fair Week in Store Windows—Decorating of Booths Can Begin Thursday.

Requests that the merchants of Maysville take advantage of fair week to display their holiday goods, and prepare attractive window displays are being mailed to Maysville business men today by Secretary George Kirk. He lays particular emphasis on the fact that there will be many visitors at fair who do not habitually trade in Maysville, and points out the opportunity to increase local business by means of attracting new customers.

Mr. Kirk also wishes to call attention to the fact that the booths will be ready for occupancy tomorrow morning, some of them being ready now. He stated that there should be no excuse for delay in preparing the booths, and urges those who have exhibits to have them ready for the opening of the fair. Everything should be finished by Monday night at the latest, and preferably Saturday night.

The decorating of the Liberty warehouse was started Tuesday and Mr. Kirk and two helpers expect to have the work completed by Thursday. The booths for the concessions which the Chamber of Commerce will operate have been completed and will be decorated today.

All booths will be around the walls with the exception of the concessions referred to, the Manual Training booth, and the Farm Bureau and the Chamber of Commerce rest room and information bureau. The old practice of placing booths in the main floor caused congestion of the crowds which will be avoided this year.

Every provision for comfort has been made, and one can remain from morning to night with eats, drinks and amusements in profusion all under one roof.

Attention is again called to the increases in the premiums offered in the culinary departments.

TABACCO ASSOCIATION TO HOLD ANNUAL MEET MONDAY NIGHT.

The Maysville Tobacco Association will hold their annual meeting next Monday night at which time the regular election of officers will take place including the election of sales supervisor.

The date of opening of the Maysville loose leaf tobacco market will be decided upon at this meeting. Just what the date will be is still problematical, there being some who want the market opened in December while others favor opening the first week in January. Very likely the date will be set for January 4th, the day the market opens at Lexington.

The Missionary Circle of the Christian church enjoyed a delightful dinner on Tuesday evening in honor of Mrs. Stanley, of Louisville. Miss Mary Eunice Knox presided over the evening. The following members and guests were present: Mrs. L. H. Young, Misses Katie Hughes, Elizabeth Boughton, Hattie Rose Sulser, Minnie Miller, Alma Nower, Jennie Dickson, Laura Farrow, Betsy Lancaster, Blanche Parker, Mae Stevens, Marie Boughton, Amy Baugh, Lola Chamberlain and Ethel Lee Griffin.

RECEIVES PIPE ORGAN.

The First M. E. Church, South, has received a new pipe organ which will be installed as soon as possible. The organ was ordered several months ago and is just arriving. It cost \$2750.

NOTICE TO FARMERS.

ORGANIZATION OF BURLEY ASSOCIATION FINISHED TUESDAY

The Thirty-One Incorporators Elect Officers and Transact Other Business at Lexington Meeting.

Immediate organization of statistical, educational and administrative divisions followed the election of directors and officers of the Burley Tobacco Growers' Association at Lexington Tuesday.

The thirty-one incorporators of the organization, the scope of which will extend from Virginia to Missouri, gathered in the general offices of the association Tuesday morning at 11 o'clock to elect officers, but as there were several absent of the directorate the election was postponed until November 30th.

The statistical division, as outlined Monday afternoon by temporary officers of the company, will have charge of the work of ascertaining the number of acres under cultivation, tobacco barns, sticks, equipment and warehouses in the Burley Belt and keeping on file at general headquarters at all time such information as is considered important to the proper conduct of the association's program.

This department is counted upon as being one of the most important in the organization. The program outlined for it would practically prevent inaccuracies in crop estimates, such as growers believe are present in the report on the 1920 Burley crop made public Saturday by government agencies.

The educational division will co-operate with the United States Department of Agriculture, State Department of Agriculture and other agencies in insuring that all members of the association get first-hand information on the latest developments toward the growing of high grade Burley tobacco at a minimum cost. Means of combating rust, mildew and other plant ravages will come within its scope.

The administration division will have charge of the conduct of the organization. According to temporary officials, it will work to prevent what is known as "over production," unsettled conditions and disastrous prices. After the organization is firmly on its feet a promotion division is expected to be established. The purpose of this organization will be to insure a steady market for American grown Burley tobacco at prices fair to the grower.

DR. WINNES IS HELD TO THE GRAND JURY

Jerry Reed, Negro, Also Held With Him—Both Are Placed Under \$5,000 Bond.

Harian, Ky., Nov. 16. — Dr. H. C. Winnes, State Veterinary agent, and Jerry Reed, negro convict, were held to the January grand jury by Judge W. L. Bailey at the close of an eight-day investigation of the assault and murder of Miss Eura Parsons. The case against James Robinson, negro convict, was taken under advisement for several days, while Courtney "Hickory" Kendall, also a negro prisoner, who was arrested yesterday was dismissed.

The period of the closing of the testimony to the decision of the judge was as undramatic as it was brief. There was no argument by counsel. The several attorneys made short statements and the judge's laconic decision was, "I'll hold Dr. Winnes and Jerry Reed under \$5,000 bond pending a grand jury investigation. I'll discharge Courtney Kendall. I'll take the case of James Robinson under advisement for a few days."

Attorneys for Dr. Winnes, after introducing physicians who knew him well in an effort to show his action was not those of a drug addict, and after making a futile attempt to incriminate Kendall, announced that their case was closed.

SUGAR SLOWLY COMING DOWN IN WHOLESALE PRICES.

New York, Nov. 16. — A new low record for the season was established today in the local refined sugar market, when the Federal Super Refining Company announced a further reduction of one-fourth cent per pound in the price of granulated sugar. The price now is 9 1/2 cents.

I. O. O. F. GRAND LODGE TO MEET HERE NEXT YEAR

Present Session at Lexington Closed Today—Reports Show the Order To Be In Flourishing Condition.

The meeting of Kentucky Grand Lodge of Oddfellows, which has been in session at Lexington the past two days adjourned today.

Reports of the grand officers as read to the representatives show that Oddfellowship has been very much alive during the last year, there having been a substantial gain in membership and a phenomenal gain in the finances of all the lodges throughout the state.

At the morning session today it was announced that the parade, which is a feature of the meeting, had been called off on account of the weather, and the Grand Lodge went into the election of Grand officers, which resulted as follows:

Grand Master — John W. Douglas, of Owenton.

Deputy Grand Master — E. B. January, of Paris.

Grand Warden — C. B. Helburn, of Eminence.

Grand Secretary — R. G. Elliott, of Lexington.

When nominations were opened for the next place of meeting the representatives unanimously nominated and selected Maysville, and the meeting in 1921 will be held the second Tuesday in October.

Messrs. Miko and Tom Coyle, of Westport, Conn., who have been the guests of Mr. John Leonard, of East Fourth street, for the past week have returned home.

WHY THEY FAIL!

On reading the statistics on business, the fact is learned that 90 per cent. of merchants fail! Why?

"One cause of many failures (You need not look for more), Is the LOW price in the windows, And the HIGH prices in the store."

Just to Show that the moral of the above don't apply to us, we will say—and our language is plain—that whenever you find anything outside our place that we cannot duplicate inside, just take the store, we will have no further use for it.

OUR POLIOY

To support such measures as are unquestionably for the good of Mason County as an entire community, rather than such propositions as are in favor of the individual interest, or of one section as against another. And likewise to earnestly and consistently oppose all things that are not for the good of the County as a whole.

THE JAP AND HIS PRODUCTS.

Controversy over the new California statute restricting the land-owning rights of Asiatics serves to call renewed attention to the menace of Oriental competition in trade. Californians, and, in fact, residents of all the Pacific Coast states, are determined to shut out Oriental labor because it works on a standard of income and living with which an American will not compete. The Japs in particular drive the American fruit growers and gardeners out of business. But it is realized that the Jap works at an even lower standard at home than he does here, and under a free trade policy, goods produced in Japan can be shipped into the United States with destructive effect upon American industry. It is reported that more than \$6,000,000,000 worth of American made textile machinery was shipped to the Orient last year, and the product of the machinery will come into competition with similar products of mills operated here.

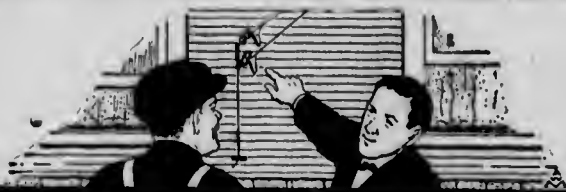

THE TEXAS TRICK.

That all the Democratic ballots cast in the state of Texas were invalid and that the Republican candidates were elected is asserted by Walter Holland, a Washington attorney formerly practicing in the Lone Star State. Holland declares that under Texas statutes no names can go on a Democratic ballot unless the candidates were nominated at a direct primary and that the supreme court has held ballots defective if printed in violation of the law. The candidates for Presidential Elector on the Democratic ticket were named by a convention. There is talk of testing the validity of the election, but since the Republican victory was so overwhelming, nothing may be done.

Washington Post—If any Democrat is entitled to say "I told you so," it's Jim Reed, of Missouri.

Recent comparative tests have shown that ethylene is a good substitute for acetylene in cutting and welding operations. As far as heat of combustion is concerned ethylene has a slightly higher efficiency.

The copper produced in the United States last year was valued at \$243,000,000, as compared with \$471,000,000 for 1918. There was also a decline in the amount of lead and zinc produced.

"The Wires are Already There—"

Sometimes, when folks order a telephone, they say: "It won't take you but a few minutes to install it, because the wires are already on the house."

BUT—

The circuit from the house all the way to the telephone exchange is the one that really counts—

That circuit is released—used for some other subscribers—when a telephone is removed.

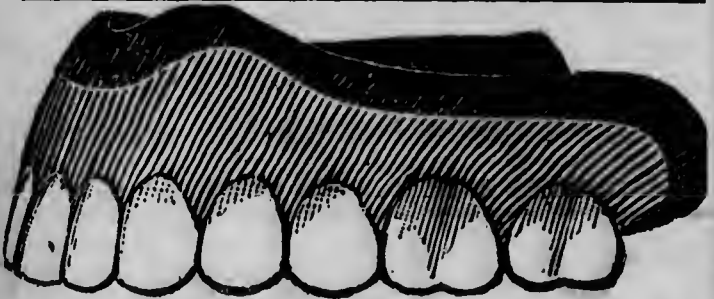

Another must be built up for you before your telephone can be installed, and that takes time and work—

That is why it takes longer than "just a few minutes" to install a telephone—because there is a great deal more to do than simply to fasten the instrument on your wall!

RUBBER IS TREE'S MEDICINE.

The rubber tree has many enemies in the form of beetles, which constantly attack it by boring holes in its bark. The tree, defends itself by throwing out a fluid which quickly fills up this hole and hardens. Now, since the rubber trees sway back and forth in the wind, there is danger that this stopper will be wrenched loose, thus preventing the wound from healing. This fluid is therefore of such a consistency that when hardened it is elastic and the movement of the tree does not open the wound. This stopper is made of rubber. By tapping the tree and drawing off this fluid we have gained this invaluable product and put it to thousands of uses. — Boys' Life for November.

More than one hundred women are members of town council in Sweden.

IN PLACE OF EQUEDUCTS.

The famous aqueducts of Rome seems very clumsy affairs compared with our modern engineering methods of building. There were nineteen aqueducts built by the Romans about 200 B. C., having a total length of 381 miles. Many of these were so well built that they stand to the present day. But the Romans were obliged to build aqueducts over hill and valley so that the water could flow by gravity. The modern method is to siphon water from one level to another. The Romans understood the principle of the siphon, but could not apply it, because they could not build piles strong enough to stand the pressure of the water. Modern steel pipes have revolutionized the process and saved hundreds of miles of construction. — November Boys' Life.

Ledger Service—Efficiency.

To pack and keep ordinary butter in India is impossible, it becoming fluid almost from the moment it is made. To overcome this the idea was conceived of putting it into collapsible tubes, the same as tooth paste and oil paints.

CITY SCHOOL HEADS OF KENTUCKY ARE CALLED TOGETHER

Superintendent W. J. Caplinger Starts Movement To Organize City School Heads Into One Organization.

Supt. W. J. Caplinger yesterday mailed the following letter to the City School Superintendents of the state calling a meeting at Frankfort on November 26th:

"The State Superintendent and a number of the superintendents have expressed themselves as desiring a meeting of the city superintendents at Frankfort to discuss our mutual problems, but more especially the question of certification of city teachers. A plan was inaugurated in July to take care of this certification problem for the remainder of this school year. It is desirable, however, that we have a meeting of all of the superintendents in order that plans may be made for the coming year not only to make our conclusions more general and far-reaching concerning the examinations, but also that we may effect a working organization of city superintendents who are not afraid of their time and talent invested in the advancement of Kentucky schools.

"As President of the Fourth Class City Organization, I am calling this meeting to be held in Frankfort, Friday, November 26th, morning session beginning at 10:30 and an afternoon session from 1:30 to 3.

"I have asked Supt. Colvin to address us on the subject of 'Certification of Teachers' and Supt. H. L. Donovan, Catlettsburg, to speak to us on the subject of 'A Practical City School Survey.' Ample time will be afforded for round table discussion, at which

time, we expect to hear from every superintendent that feels that he has something to contribute to the promotion and happy solution of the above questions.

It is the desire of Supt. Colvin that a plan be worked out that will embody these two ideas:

"(a) That it meets with the approval of the various Superintendents and Boards of Education.

"(b) That it meets the needs of the public school of Kentucky.

"Supt. Donovan has had considerable experience in survey work both in the Army and Columbia University, consequently, he will have something worth while for our consideration.

"As the state is making its survey of the school systems, let us meet and agree upon a uniform survey for our cities. I think this is highly important that our findings may establish forms for Kentucky.

"Be sure and come.

"Most Boards of Education are going to pay the expenses of the superintendents at this meeting.

"Yours to make Kentucky rank better than '46th'."

COUNTY TAXES ARE COMING VERY SLOW.

Sheriff Galbreath stated Tuesday morning county taxes are being paid slower this year than usual. The time for paying taxes is growing short. The penalty goes on December 1st, leaving only twelve more days in which to satisfy the demands of the state and county. He who are delaying in this matter had best get busy.

A vast supply of sodium sulphate is represented in the deposits of some of the lakes in Siberia. Lake Marmyshansk alone is estimated to contain about 3,000,000 tons.

The chief industry of Abyssinia is the breeding of cattle.

RECRUITS WILL BE SENT TO GREAT VOCATIONAL SCHOOL

New Army Recruits Wanting Course In Farming Will Go to Camp Travis Under New Orders.

Under the hurry-up telegraphic orders sent out by the War Department on November 9, all recruits who now enlist in the Army for a course in farming will be sent to the vocational school at Agriculture at Camp Travis, Texas, unless the soldier desires otherwise. The famous Second Division, affectionately known as the "Indian Head," which saved Paris by stopping the Hun along the Paris-Metz road at Belau Wood and Vaur, is on duty there. The telegrams directed that this division be recruited to full strength immediately.

The agricultural schools maintained by the Second Division are among the best-equipped in the Army. Courses are provided in horticulture, agronomy, dairying and animal husbandry, and a fine irrigated farm has been bought, where soldier students may be turned into scientific farmers.

The course in horticulture includes theoretical and practical work in the growth of fruits, flowers, and ornamental shrubbery. In agronomy the student takes up the study of soils, with special reference to irrigating agriculture. Great artesian wells supply the water necessary.

Instruction in dairy husbandry includes types and breeds of dairy cattle. Practical work is given in judging stock, and visits are made by the soldiers to famous cattle farms near by. The school farm also provides practical work in animal husbandry.

To the average farmer it may seem strange that Uncle Sam's soldiers are engaged in making the desert bloom. But this is exactly what they are doing. Adjacent to the great military reservation is a 400-acre farm, under the supervision of George G. Snow, who comes from Mississippi Agricultural and Mechanical college, where he taught for twelve years. Assistant Mr. Snow is Joel I. McGregor, formerly dairy specialist for the Houston Chamber of Commerce, in charge of the department of animal husbandry.

Quoting Major General P. C. Harris, the Adjutant General of the Army: "The aim of the school is to give each soldier in the army as thorough and practical an education as he is willing to accept; to give him instruction in any subject he desires to take; and so to arrange the courses and hours of instruction that his military duties will not be slighted."

THE MAYFLOWER PASSENGERS.

"The official record of names in the cabin of the Mayflower in 1920 was as follows," says an article in the November issue of Boys' Life:

"Isaac Allerton, John Billington, John Carvers, James Clinton, Richard Clerk, Francis Cook, John Crookston, Edward Doty, Francis Eaton, Thomas English, Moses Fletcher, Edmund Fuller, Samuel Fuller, Richard Gardiner, John Goodman, Stephen Hopkin, John Howland, Edward Mergestow, Christopher Martin, William Mullins, Degony Priest, Edward Lester, John Rigdale, Thomas Rogers, George Soule, Miles Standish, Edward Tilly, John Tilly, Thomas Tinker, John Turner, Richard Warren, William White, Thomas Williams, Edward Winslow, and Gilbert Winslow."

DOUBT DISAPPEARS No One in Maysville Who Has a Bad Back Should Ignore This Double Proof.

Does your back ever ache? Have you suspected your kidneys? Backache is sometimes kidney ache. With it may come dizzy spells, Sleepless nights, tired, dull days, Distressing urinary disorders, Doan's Kidney Pills have been endorsed by thousands. Reawakened testimony; tested by time. You have read Maysville proof. Ask your neighbor! Read how the Maysville sequel.

Fred Dresel, tailor and justice of the peace, 1233 E. Second St., Maysville, says: "I was troubled by inflammation of the bladder and annoyance from my kidneys. The kidney secretions burned in passage, and often were urinary disorders. I had severe pains across the small of my back which greatly interfered with my work. Doan's Kidney Pills, which I got at Wood & Son's Drug Store, gave me prompt relief."

NEARLY NINE YEARS LATER, Mr. Dresel added: "I have had the same faith in Doan's Kidney Pills today as ever, for I haven't had any trouble with my kidneys since I last recommended them."

Price 60c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Dresel had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

IRST COLLEGE "Y." AT HANOVER COLLEGE

Building Which Housed First College Y. M. C. A. Is Still Standing at Hanover.

Hanover, Ind., Nov. 16. — With a college Y. M. C. A. building on every college campus in the country, or a place devoted to that organization, the tiny Y. M. C. A. building that stands on the campus at Hanover College, is no longer the great curiosity that it formerly was. But once it was the only college Y. M. C. A. in the United States, and it is the indirect ancestor of all that followed it.

The college Y. M. C. A. movement is of comparatively recent date, and it was in the early eighties that the Hanover students came together to put up the little building which to this day serves as the home of the college Young Men's Christian Association. The college boys still regard it as peculiarly their own, and jealously guard the right of repairing it and keeping it in condition without outside help.

How much the cause of Christian education in the Great Northwest owes to the first little Y. M. C. A. building at Hanover will never be known and can never be estimated, but it is sure that the stimulus of the first college building devoted to this purpose was a great one, with an equally great moral effect. At least Hanover was strongly influenced by it, an influence which shows today.

In the campaign for \$500,000 endowment of the college now going on, no provision is made for a new Y. M. C. A. building. Certain it is that no new structure would ever be permitted to supplant this pioneer building, either physically or in the hearts of Hanover men and women. But the endowment will help in other ways, by increasing to a living wage the salaries of long-faithful professors, who are giving their lives to Hanover at \$1,700 a year, and by perfecting the equipment to meet the Hanover ideals of the highest standard of Christian education.

THE FAR SIGHT OF THE MOUNTAIN SHEEP. "The mountain sheep is one of the most difficult of all our American game to approach in the open," says Charles L. Smith in an article on the Rock Mountain Sheep in Boys' Life for November. "It has eyes like a telescope for keenness and can discover and make out a man father away than any other animal of which I have any knowledge, and where any considerable herd have been feeding one will see usually one or more standing on some prominent point where they can get a view of the surrounding country. I know of no moer inspiring sight than one of those old rams with his massive horns outlined against the sky, standing as motionless as a statue. And it is a wonder to the hunter, how they get across the rocky slopes with such ease and grace. There has been much written of the mountain sheep, of its wonderful feats of springing from ledges and lighting upon its head and horns, which is without foundation in fact. While it is true they can stand an immense shock in battle, yet if one of those sheep weighing three hundred

pounds should drop from a ledge of any considerable height and land on his head his neck would be broken. I spent several years in the sheep country in the Canadian Rockies and was near the sheep or among them during all seasons of the year and they seem to be less sensitive to the rigors of winter and the ever changing elements of the high altitudes than any other animal except possibly the mountain goat, and of these animals I think they have the advantage because I have a number of times found mountain goats yarded in the deep snow in places where food was scarce, but I have never yet found mountain sheep in this condition."

MAKING THE SEA SAFE.

The approach of storms at sea is now reported with surprising accuracy by means of wireless electricity. An ingenious device make it possible to pick up news of their approach long before local conditions are effected. It is not only possible to learn of the position of storms when many miles distant, but to know the direction they are taking. The tests have been made with great success at the Naval base at Pensacola, Florida. It is a simple matter to get news of the approach of storms over land, but the conditions at sea have been baffling.
